PROFESSIONAL SUMMARY

ERP Application Support Specialist with solid experience in ERP administration, incident management, SQL Server, systems integration and business process improvement. Strong background in TOTVS Protheus, supporting financial, accounting, purchasing, inventory, sales, logistics and production-related processes.

Experienced in root cause analysis, user support, ERP configuration, reports, data analysis, external consultant support and software vendor follow-up. Able to connect business needs with technical solutions, focusing on reliability, documentation and continuous improvement.

CORE COMPETENCIES

ERP Application Support | ERP Administration | Incident Management | Root Cause Analysis | Business Process Analysis | SQL Server Data Analysis | Systems Integration | User Support | Technical Documentation | Process Improvement | ERP Configuration and Parameterization | Requirements Analysis | Functional and Technical Support | Financial, Accounting, Purchasing, Inventory, Sales, Logistics and Production Processes

TECHNICAL SKILLS

ERP Systems: TOTVS Protheus, ERP modules, configuration, parameterization, administration and application support.
Programming and Customization: ADVPL, TLPP, Protheus routines, reports, validations and business rules.
Databases and Data Analysis: Microsoft SQL Server, T-SQL, queries, data validation, troubleshooting and reporting.
Systems Integration: ERP integrations, banking integrations, fiscal routines, APIs, REST services, XML and data exchange.
Reporting and Productivity: Power BI, Power Query, Excel, Microsoft 365, Python, automation scripts, Git, GitHub and Visual Studio Code.

PROFESSIONAL EXPERIENCE

Systems Analyst / ERP Application Support

Terraverde Máquinas Agrícolas LTDA | Brazil | Oct 2023 – Oct 2026

- Provided functional and technical support for TOTVS Protheus ERP, covering financial, accounting, fiscal, purchasing, inventory, sales, logistics and operational processes.
- Analysed incidents, investigated root causes and supported users in the resolution of ERP-related issues, ensuring business continuity and operational reliability.
- Administered ERP configurations, parameters, routines, reports, validations and business rules according to business requirements.
- Used Microsoft SQL Server and T-SQL to investigate data issues, validate information, support reports and analyse business process behaviour.
- Supported systems integrations involving ERP processes, banking operations, fiscal routines, XML files, REST services and external software solutions.
- Acted as a bridge between business users, internal IT teams, external consultants and software vendors, translating operational needs into practical ERP solutions.
- Participated in process improvement initiatives, identifying opportunities to reduce manual work, improve controls and increase data reliability.
- Created technical documentation, support procedures, analysis records and operational guidelines for ERP-related processes.

ERP Systems Analyst / Protheus Support
Previous Professional Experience | Brazil | 2010 – 2023

Selected companies and projects: Lemasa (2020–2023), ITUP Business (2018–2020), FDA Silva Tecnologia em Informática (2013–2018), SigaSis Consulting & TI (2014–2015), MLEAL TI (2012–2014), Flabeg Brasil (2011–2012), Glasshield Security Products (2010–2011).

- Implemented and supported TOTVS Protheus modules such as Financial, Billing, Inventory/Costs, Production Planning and Purchasing.
- Worked with ERP configuration, parameterization, user support, process analysis and business requirements gathering.
- Supported manufacturing, purchasing, inventory, sales and financial processes through ERP analysis, reporting and system improvements.
- Investigated system inconsistencies, data issues and process failures, supporting corrective actions and continuous improvement.

Production Planning and ERP Support
Looking Acessórios para Máquinas de Papel / Industrial de Autopeças Ltda | Brazil | Oct 2002 – Apr 2010

- Worked in production planning and control within manufacturing environments, supporting production schedules, inventory analysis, material requirements and operational planning.
- Participated in TOTVS Protheus implementation and version migration activities, gaining hands-on experience with ERP processes from both operational and system perspectives.
- Supported ERP users in production, purchasing, inventory and materials-related routines, helping improve process adoption and operational control.
- Created reports and supported ERP configurations and parameterization related to production planning, inventory control and manufacturing processes.
